

FOR IMMEDIATE RELEASE

RooSites Web Development, LLC Named Best of Florida® Winner for Web Design for Fifth Consecutive Year

Guide to Florida recognizes RooSites among Florida's leading website design firms for the fifth year in a row

DUNEDIN, FL — August 31, 2026 — RooSites Web Development, LLC is proud to announce that it has been named a **2026 Best of Florida® winner for Website Design by Guide to Florida**, marking the **fifth consecutive year** the web design, development, and website management company has earned the prestigious recognition.

With its Florida office in **Dunedin** and Northeast offices in **Boston and Foxboro, Massachusetts**, RooSites provides professional web design, development, and ongoing website management services to businesses and organizations throughout Florida, New England, and across the United States.

The annual **Best of Florida® awards, presented by Guide to Florida**, recognize outstanding businesses and organizations across the state in a wide range of industries. RooSites' recognition in the website design category is particularly meaningful because it reflects the company's commitment to creating professional websites while providing the long-term service and support needed to keep them successful.

"We are incredibly grateful to be named a Best of Florida winner for web design for the fifth straight year," said **Barry Roos, Founder of RooSites Web Development, LLC**. "Florida has become an important part of RooSites, and we're especially proud to receive this recognition representing our Dunedin office. To be recognized for the work we do five years in a row is a tremendous honor and something we don't take for granted."

More Than Web Design

While the Best of Florida recognition honors RooSites for website design, the company's approach extends well beyond the initial design and launch of a website.

RooSites provides website design and development, WordPress development, e-commerce, search engine optimization, hosting, website security, maintenance, and ongoing website management.

A key part of the RooSites approach is its belief that launching a website is only the beginning.

Technology changes. Search engines evolve. Security threats emerge. Businesses introduce new products and services, add employees, expand into new markets, and change their priorities. Successful websites need to evolve along with them.

RooSites works with clients on an ongoing basis to keep their websites secure, current, optimized, and effective.

“Our philosophy has always been that a website is never truly finished,” Roos said. “We don’t want to simply design a website, launch it, and disappear. We want to be the company our clients can call today, tomorrow, and years from now when they need something changed, improved, fixed, or added.”

That emphasis on long-term relationships has helped RooSites build a client base extending from Florida to Massachusetts and throughout the United States.

Proud to Represent Dunedin and Florida

RooSites’ **Dunedin office** serves businesses and organizations throughout the Tampa Bay region and across Florida. Receiving the Best of Florida award for web design for five consecutive years represents an important milestone in the company’s continued presence in the state.

At the same time, RooSites maintains its strong Northeast presence through its **Boston and Foxboro, Massachusetts offices**, serving clients throughout Massachusetts and New England.

The company’s multi-state presence, combined with the ability to work seamlessly with organizations anywhere in the country, has allowed RooSites to develop and manage websites for clients across a wide range of industries and locations.

“We’re extremely proud of five consecutive Best of Florida awards, but we’re even more appreciative of the clients who have trusted us with their websites and their businesses,” Roos added. “Their continued support is what makes recognition like this possible.”
